

Babies In Utero

Scripting Workbook

ASSET DELIVERY

GENERAL CHECKLIST:

- Software used: Unity, JetBrains, Visual Studio, Notepad++
- Each script must be named in a way to indicate the function/use
- Be consistent with your code

TECHNICAL CHECKLIST:

Unit & Format

- C#
- All scripts should be saved in an Assembly-Csharp file format .cs

Scripts

- Variables use bumpy case naming (bumpyCase)
- Functions use camel case naming (CamelCase)
- Name variables and functions that indicate what data the variable or function dose
- Avoid single letter variables except in cases such as “for” loops
- Do not include number digits in variable names
- Name flags with Is, Has, Can, Allows or Supports, such as *isAvailable*, *isNotAvailable*, *hasBeenUpdated*
- Keep spacing and indentation consistent

BACKUP AND UPDATE

GitHub

Please check your work into GitHub as often as possible as a form of backup. GitKraken should be used to push work onto GitHub.

Glo Boards

Please use the Glo Boards as a way to keep on task and to help others to see what you are working on. Upload images for in-progress and completed tasks. Make sure to assign yourself to your tasks, add due dates and utilize the labels to keep an organized workspace.

CONTACT

The following list will help you to know who to contact with questions.

Contact Information

NAME	SPECIALTIES	EMAIL
Gavin Lopes	Sculpting, Modeling, Texturing	10655472@my.uvu.edu
