*Student at Utah Valley University*

## EDUCATIONAL EXPERIENCE

8-Years of Independent Study

Undergraduate at UVU in  
Animation & Game Development

## PROJECT EXAMPLES

*click on the pictures to see the examples better*

### Rayman Legends Scene - 3D Remake

Modled, Textured, Rigged, and Animated a 3D recreation of a scene in Rayman Legends.  
This scene is the end screen from the Orchestral Chaos level.

### Anthrophobia

Scripted and built a Horror game for a  
Halloween Game Jam.

### C0V1D-20

Scripted and built a few levels of a top-down  
action adventurer game.

## BIO

Nathan started working in animation and game development during his middle school years and had made several projects on his own before entering college. After his first year of college Nathan was one of 25 students, out of 200+ applicants, to be accepted into the Animation and Game Development Program at Utah Valley University (UVU).

He is currently studying to become a Technical Artist and will earn his Bachelors Degree at UVU by 2022. He hopes to educate future generations by building digitally interactive educational experiences that could be used at school or in the home.

[Ratchet and Clank Environment Remake](#)

## BIO

To gain admission into a heavily competitive Utah Valley University's Gaming & Animation program, Gavin had earned one of only twenty-four spots. Entering his Junior Year, he looks to continue to compete with his work as he begins to put together a portfolio. He has a passion for the aesthetics of the program as in, modeling, texturing, and rendering but also enjoys the technical challenge of coding and rigging. He will complete his degree earning a Bachelor's in Computer Science come the spring of 2022. Gavin's goal is to one day become a Creative Director for a Triple A gaming studio.
